REQUEST FOR QUALIFICATIONS

BACKGROUND

The District is seeking Statement of Qualifications (SOQs) in response to this RFQ from experienced entities to provide CEQA consulting services for various projects to be delivered under the District’s Capital Improvement Bond Program. This RFQ defines the services sought by the District and generally outlines the requirements for the various projects. Briefly stated, the District is seeking experienced and proven CEQA consultants to provide guidance to the District for the program and for each project.

The District is engaged in ongoing new construction and major modernization projects, site development and planning, growth projects and area-wide planning associated with the intended passage of a local bond issue. Using the anticipated bond funds, the District will be renovating, modernizing, and constructing facilities over a 10 to 15 year period.

The Facility Master Plan for the District will be completed in early 2014 and adopted by the District Board of Education (“Board”). The District expects to start this major building program in early 2014. It is anticipated that the District will act as the “lead agency” for appropriate CEQA clearance and certifications, and it is important that all environmental issues be assessed, and if necessary, addressed in an appropriate Environmental Impact Report or other document.

The District invites any qualified firm to submit qualifications related to its ability to provide the services necessary to obtain environmental clearance and entitlement to construct the Project(s) described herein. In general, the firm(s) selected as a result of this process (“Firm”) will provide a proposal to the District to perform environmental consulting services necessary to complete the Project and thereafter work cooperatively with the Board, staff and consultants, the architect of record and design team, and the Project inspectors, to facilitate the timely completion of the Project. The District wishes to retain a pool of Firms that have the financial strength, management and expertise to assist the District with delivering the Project within the proposed schedule.

DESCRIPTION OF PROJECT

The District is managing a Capital Improvement Bond Program consisting of Measure G and Measure Q in excess of $348M and it includes three campuses. There is the main Campus in Fairfield and two educational centers, one in Vallejo and one in Vacaville. There will be expansions and or reconfiguration at each of the campuses and the District will require CEQA consultants to assist with a Campus Wide Report and management of CEQA requirements for each project on the various campuses.

DESCRIPTION OF DISTRICT NEEDS

Firms will be selected for the pool of CEQA consultants based on qualifications and demonstrated competence in providing environmental consulting services that may include, but not be limited to the following:
Preparation of all documentation necessary to initiate, process, review, and ultimately obtain certification of a Project Environmental Impact Report or other appropriate environmental documentation (i.e. “Negative Declaration”) that will environmentally clear approval and implementation of the Project in compliance with CEQA. Such documentation will include an initial study, notices, mailings, technical reports, exhibits, the Draft and Final EIR (if necessary), findings, approval documents and other documentation, and studies, as required to complete the CEQA process. Services will likely include, but are not limited to, the following:

a) Conduct appropriate scoping activities to identify issues and define the proposed project and alternatives for analysis; meet on an ongoing basis as appropriate with community and affected agency representatives, district administrators, master planners, and associated consultants already under contract at the District; prepare, maintain and implement a CEQA processing schedule to assure efficient and timely preparation and processing of the appropriate environmental clearance, and if necessary, the EIR.

b) Prepare and distribute the initial study and notice of preparation;

c) Prepare Administrative Draft environmental documents;

d) Prepare and circulate draft environmental document;

e) Conduct public hearings and meetings, as required;

f) Prepare administrative environmental impact report document;

g) Present draft and final report to the Board; and

h) Prepare the Final EIR with responses to comments, findings of fact and statement of overriding considerations (if applicable), mitigation monitoring program, certifying resolution, notice of determination and related documentation;

The District may assign all or parts of the work described above to one or more of the successful firm(s).
