

DRAFT LANGUAGE—Addition to Procedure 6105

II. B. 1a

The Curriculum Committee may also propose program discontinuance:

- In cases where courses in a program are not available to students, curriculum committee may designate these courses as inactive and remove them from the current curriculum inventory. Where absent courses affect the ability to complete an identified certificate or degree, the degree or certificate shall also be designated inactive and removed from the curriculum inventory and therefore the current school catalogue.
- In cases where discipline faculty argue for the deletion of a program and in the department is highly likely to benefit from program discontinuance.
- In cases where an inactive program is otherwise slated for deletion.

In making this determination, Curriculum Committee shall account for the input of faculty in the discipline, or, where absent, faculty in similar disciplines, as well as any additional program review data.
