Please note: this expertly tabulated data table encompasses all biology courses. The data for Anatomy and Physiology, for which we are requesting a faculty position, has not been segregated, which does not tell the real story. For Fall 2021, registration data shows that there were 17 sections of Anatomy + Physiology, all with full waitlists until the start of the semester. This represents as many as 340 students whose academic needs may not have been met by the college. These are enough students to fill up to 11 sections of A&P.
