Mathematics

Program Description
Successful completion of this major will assure competence in mathematics through differential and integral calculus, providing an adequate background for employment in many technological and scientific areas as well as providing a firm foundation for students planning advanced study.

Associate in Arts Degree
An Associate in Arts Degree can be obtained upon completion of 60 units, including the 20-21-unit major listed below, general education requirements, and electives. All courses for this major must be completed with a grade of C or better or a P if the course is taken on a Pass/No Pass basis.

Program Outcomes
Students who complete an Associate Degree will be able to:
1. Solve problems by applying appropriate math concepts and ideas; and
2. Effectively communicate the solution(s) of these problems.

REQUIRED COURSES ....................... Units
MATH 020 Analytic Geometry and Calculus I ........ 5
MATH 021 Analytic Geometry and Calculus II ....... 5
MATH 022 Analytic Geometry and Calculus III ...... 4
MATH 023 Differential Equations ................... 4
OR
MATH 011 Elementary Statistics ................... 4
OR
MATH 012 Mathematical Ideas ................... 3
MATH 040 Introduction to Linear Algebra .......... 3

Total Units ................................. 20 - 21
Mathematics

Associate in Science in Mathematics for Transfer

Program Description
Successful completion of this major will assure competence in mathematics through differential and integral calculus, providing an adequate background for employment in many technological and scientific areas as well as providing a firm foundation for students planning to pursue a baccalaureate degree in mathematics.

Associate in Science in Mathematics for Transfer
The Associate in Science for Transfer is especially appropriate for students who plan to complete a bachelor’s degree in Mathematics at a CSU campus. Students completing an AS-T degree are guaranteed admission to the CSU system, but not to a particular campus or major. Students transferring to a CSU campus that does accept the AS-T will be required to complete no more than 60 units after transfer to earn a bachelor’s degree. This degree also prepares students for mathematics degree programs at other four-year institutions, but does not come with the same guarantees. In all cases, students should consult with a counselor for more information on university admission and transfer requirements.

To earn this AS-T degree, students must:
• complete the following major requirements with grades of C or better;
• complete a minimum of 60 CSU-transferable semester units with a minimum grade point average of 2.0
• complete either the California State University General Education Breadth pattern (CSU GE), which requires 39 units, or the Intersegmental General Education Transfer Curriculum (IGETC), which requires 34-39 units. Students are not required to complete Solano’s Cross-Cultural Studies requirement.

ADTs also require that students must earn a C or better in all courses required for the major or area of emphasis. A “P” (Pass) grade is not an acceptable grade for courses in the major.

Program Outcomes
Students who complete an Associate Degree will be able to:
1. Solve a problem applying appropriate math concepts and ideas.
2. Effectively communicate solution(s).
These will be assessed using techniques employed by individual instructors in the capstone courses of MATH 022 and MATH 040.

REQUIRED COURSES .......................... Units
MATH 020 Analytic Geometry and Calculus I ........ 5
MATH 021 Analytic Geometry and Calculus II......... 5
MATH 022 Analytic Geometry and Calculus III ....... 4
MATH 023 Differential Equations .................. 4
OR
MATH 011 Elementary Statistics ..................... 4
MATH 040 Introduction to Linear Algebra .......... 3

Total Units .................................... 21
MATH 002 3.0 Units
Algebra For Calculus (College Algebra)
Prerequisite: MATH 104 with a minimum grade of C.
Course Advisory: SCC minimum English standard.
Designed to develop the skills and introduce the concepts necessary for further study in mathematics, and facilitate the application of those skills and concepts to other fields. Included is a review of elementary set algebra; the algebra of functions; the real and complex numbers as a field; algebraic, exponential, and logarithmic functions; equations and inequalities of these functions; solution of linear systems, matrix algebra, and introduction to sequences and series. Lab hours may be scheduled or TBA depending on section. Students are expected to complete both the lecture and lab portions of the course. Three hours lecture, one hour lab.

MATH 004 5.0 Units
Precalculus Mathematics
Prerequisite: A minimum grade of C in both in MATH 103 and 104. Course Advisory: SCC minimum English standard. A comprehensive study of the mathematics that is prerequisite to the calculus sequence. Topics included are the elementary functions and their graphs, methods of solving equations and systems of equations, applied problems that are relevant to calculus, analytic geometry and mathematical induction. Lab hours may be scheduled or TBA depending on the section. Students are expected to complete both the lecture and lab portions of the course. NOTE: Not open to students who have completed MATH 051.0 or MATH 002.0 with minimum grade of C. Five hours lecture, one hour lab.

MATH 011 4.0 Units
Elementary Statistics
Prerequisite: MATH 104 with a minimum grade of C. Course Advisory: Eligibility for English 001. An introduction to elementary probability and statistics including the basic rules of probability, probability distributions, descriptive statistics, hypothesis testing, estimation, correlation and regression analysis. Lab hours may be scheduled or TBA, depending upon the section. Students are expected to complete both the lecture and lab portions of the course. Four hours lecture, one hour lab.

MATH 012 3.0 Units
Mathematical Ideas
Prerequisite: MATH 104 with a minimum grade of C. Course Advisory: SCC minimum English standard. An introduction to the diversity of mathematics through the examination of ideas from logic, sets, the numeration systems, and other topics from contemporary mathematics. The emphasis is on problem solving. Three hours lecture.

MATH 020 5.0 Units
Analytic Geometry and Calculus I
Prerequisite: A minimum grade of C in both MATH 002.0 and 051, or MATH 004 with a minimum grade of C. Course Advisory: SCC minimum English standard. MATH 020, the first of the three-semester sequence in Analytic Geometry and Calculus for students majoring in mathematics, engineering, and most physical sciences, is the study of the differential and integral calculus of functions of one variable. Topics covered are limits, continuity, differentiation of algebraic and transcendental functions, applications of the derivative, definite and indefinite integrals, fundamental theorem of calculus, and applications of the definite integral. Lab hours may be scheduled or TBA depending on the section. Students are expected to complete both the lecture and lab portions of the course. Five hours lecture, one hour lab.

MATH 021 5.0 Units
Analytic Geometry and Calculus II
Prerequisite: MATH 020 with a minimum grade of C. Course Advisory: SCC minimum English standard. MATH 021, the second of the three-semester sequence in Analytic Geometry and Calculus for students majoring in mathematics, engineering, and most physical sciences, continues the study of the differential and integral calculus of functions of one variable. Topics included are introduction to differential equations, computing area and volume, applications and techniques of integration, polar coordinates, infinite series, improper integrals, and L'Hopital’s Rule. Lab hours may be scheduled or TBA depending on the section. Students are expected to complete both the lecture and lab portions of the course. Five hours lecture, one hour lab.

<td>MATH 030 and 031 is a two-semester sequence in analytic geometry and calculus for students majoring in business, biological, and social sciences. This is not the calculus course for students majoring in mathematics, engineering or the physical sciences. MATH 030 covers differential and integral calculus of a single variable. Topics include limits, continuity, derivatives of algebraic and transcendental functions and their applications, integrals and their applications, and plane analytic geometry. Lab hours may be scheduled as TBA depending upon the section. Students are expected to complete both the lecture and lab portions of the course. NOTE: Not open to students who have completed MATH 020 with a minimum grade of C. Three hours lecture, one hour lab.</td>

Mathematics

MATH 098
Special Topics
These courses, numbered 048, 098, 148 or 198 depending upon their transferability, are courses of contemporary interest centered on changing knowledge and important issues in the field. Announcements of Special Topics courses appear in the Schedule of Classes.

MATH 103 3.0 Units
Plane Geometry
Prerequisite: A minimum grade of C in either MATH 330 or MATH 330B. Course Advisory: SCC minimum English standard. The study of Euclidean (plane) geometry through conjecture, proof, and problem solving. Topics include the mathematical relationships of angles, parallels, triangles, quadrilaterals, circles, and solids. Additionally, coordinate geometry transformations are covered. Lab hours may be scheduled or TBA depending on the section. Students are expected to complete both the lecture and lab portions of the course. Three hours lecture, one hour lab.

MATH 104 5.0 Units
Intermediate Algebra
Prerequisite: A minimum grade of C in either MATH 330 or MATH 330B. Course Advisory: SCC minimum English standard. An extension of the fundamental algebraic concepts developed in elementary algebra. Additional topics include arithmetic operations on functions; composition of functions; basic graphing techniques; absolute value, exponential, logarithmic, quadratic, linear, and polynomial functions; equations of the second degree and their graphs; complex numbers; and systems of linear equations in two and three variables. Lab hours may be scheduled or TBA depending on section. Students are expected to complete both the lecture and lab portions of the course. Five hours lecture, one hour lab.

MATH 112 4.0 Units
Algebraic Reasoning
Prerequisite: A minimum grade of C in either MATH 330 or MATH 330B. Course Advisory: SCC minimum English standard. In this course students will develop their ability to solve problems with algebraic reasoning. Topics include ratios, rates, proportional reasoning using fractions, decimals, and percents, evaluating expressions, functions, use of linear and exponential functions to model bivariate data, use of logarithms and logarithmic scales, financial math, probability, and graphical descriptive statistics. This course is designed for students who DO NOT plan to major in math, science, computers, engineering, or business. Students who plan to transfer will need to take MATH 104 in preparation for transfer math courses. Lab hours may be scheduled or TBA depending on the section. Students are expected to complete both the lecture and the lab portions of the course. Four hours lecture, one hour lab.

MATH 114 3.0 Units
Math For Health Occupations
Prerequisite: A minimum grade of C in either MATH 330 or MATH 330B. Course Advisory: SCC minimum English standard. This course is designed for A.S/A.A health occupation students to prepare them for math topics encountered in their chemistry, biology, and health occupation courses. Topics include metric system, dimensional analysis, counting techniques, linear models, exponential models, and common logarithms. Three hours lecture.

MATH 160 0.5 Units
Math for Nursing School Students
Prerequisite: CONDITION OF ENROLLMENT: Current acceptance or on the waiting list of an RN Program. This course focuses on mathematics topics that are critical to success for students entering an RN program. This course provides a review of select mathematics topics for students entering nursing school. This course is especially designed for students that have had an extended time period between finishing their pre-nursing requirements and entering nursing school. Pass/No Pass only class. Two hours lecture. (4-week course)
MATH 310  3.0 Units
Arithmetic
Course Advisory: SCC minimum English standard. A course in basic mathematical computations designed to improve arithmetic skills and prepare the student for a pre-algebra level math course. Major topics include whole numbers, fractions, decimals, percents, simple geometry, measurement, and basic statistics.
NOTE: Not open for credit to students who have completed MATH 304. Three hours lecture.

MATH 320  4.0 Units
Pre-Algebra
Prerequisite: MATH 310 with a minimum grade of C, or 3 units of credit in MATH 304, or 3 units of BUS 181 with a minimum grade of C. Course Advisory: SCC minimum English standard. A course in pre-algebra designed to prepare the student for transition into a beginning algebra course. Major topics include operations on integers and rational numbers, the order of operations, introduction to variables, simplifying and evaluating expressions, solving basic linear equations, proportions, percents, basic geometry, graphing, and application problems. Lab hours may be scheduled or TBA depending on the section. Students are expected to complete both the lecture and lab portions of the course. Four hours lecture, one hour lab.

MATH 330  5.0 Units
Elementary Algebra
Prerequisite: MATH 320 with a minimum grade of C. Course Advisory: SCC minimum English standard. Introductory examination of the structure of the number system. Covers such topics as an introduction to set operations, the field axioms of the real numbers, order of operations, properties of whole number exponents, variables, variable expressions, operations with monomials, definition of a polynomial, addition and subtraction of polynomials, linear equations, graphing linear equations, linear inequalities, and systems of linear equations, solutions of first degree equations and inequalities in one variable, and applications. A student must take MATH 330B to complete Elementary Algebra. Students who pass MATH 330A are not eligible for MATH 330. Lab hours may be scheduled or TBA depending on the section. Students are expected to complete both the lecture and the lab portions of the course. Formerly MATH 107. Three hours lecture, one hour lab.

MATH 330A  3.0 Units
Elementary Algebra Part 1
Prerequisite: MATH 320 with a minimum grade of C. Course Advisory: SCC minimum English standard. Introductory examination of the structure of the number system. Covers such topics as an introduction to the concept of set operations, the field axioms of the real numbers, order of operations, properties of whole number exponents, variables, variable expressions, operations with monomials, definition of a polynomial, addition and subtraction of polynomials, linear equations, graphing linear equations, linear inequalities, and systems of linear equations, solutions of first degree equations and inequalities in one variable, and applications. A student must take MATH 330B to complete Elementary Algebra. Students who pass MATH 330A are not eligible for MATH 330. Lab hours may be scheduled or TBA depending on the section. Students are expected to complete both the lecture and the lab portions of the course. Formerly MATH 107. Three hours lecture, one hour lab.

MATH 330B  3.0 Units
Elementary Algebra Part 2
Prerequisite: MATH 330A with a minimum grade of C. Course Advisory: SCC minimum English standard. Covers such topics as multiplication and division of polynomials, factoring, solving quadratic equations by factoring, operations with rational expressions, simplifying rational expressions, solutions of equations containing rational expressions, roots, radicals and the quadratic formula, and introduction to functions. Successful completion of Math 330B completes Elementary Algebra. Lab hours may be scheduled or TBA depending on the section. Students are expected to complete both the lecture and lab portions of the course. Formerly MATH 108. Three hours lecture, one hour lab.
