

STAYING COMMITTED AND CONNECTED
2017

MAY 15,

Summer Internship at CalSTRS for SCC Student

My name's Zuriel Sanders and I started at Solano Community College in the Fall of 2015. Since starting I've been active in clubs such as Alpha Gamma Sigma, student government (ASSC), UMOJA, and also the school newspaper the Tempest.

My major is economics and I plan on transferring to Cal Poly San Luis Obispo for the fall of 2017. Over the summer I'll be working in investment spending for CalSTRS which presides over retirement, disability, and also survivor benefits for nearly a million California educators.

Anatomical Demos Big Success

During the Annual Anatomical Demos, students from Vacaville, Vallejo, Rodriguez and Fairfield high schools payed our lab a visit.

In each hour, faculty met with students and instructors from a different high school. Presenters (all Bio 4 Honor students) gave short presentations on a topic of choice to 5 groups of students (approx 5-6 or 10-12 students per group) . A big thank you to professors Tom Kutz, Peggy Delgado, Norwell Darwazek and Chad Fins. Topics covered the Cardiovascular System, Abdominal Region, Skeletal System, Muscular System, Brain and Spinal Cord, and Urinary and/or Reproductive System.

Saying "Good Morning" to Colleagues...

Want to know why it's important to greet your colleagues when you start work each day? A new article in the *Business Insider* talks psychology when it comes to saying "hello" whether you feel up to it or not.

Read the article in [Business Insider](#).
