Injury Notes

03/11/2025 Daily Note

Note by: Kristin Olson

Athlete followed up after his first post operative appointment and brought athlete note pertaining to activities allowed. Note reported that from the surgery date, athlete is allowed to resume full contact 8 weeks post surgery, which would be the week of April 28th. Athlete is solely a catcher by field position. Athlete should also not have any contact through base running due to potential collisions sliding. Athlete is allowed to begin light catch and lifting activities in the gym as tolerated. It will be anticipated that the athlete will not be conditioned to complete in any post season games due to sitting out and being deconditioned.
